

**TENNESSEE GENERAL ASSEMBLY  
FISCAL REVIEW COMMITTEE**

**FISCAL NOTE**

**HB 1554 - SB 1334**

March 24, 2011

**SUMMARY OF BILL:** Authorizes municipal governments with brownfield redevelopment projects to approve economic impact plans allocating incremental property tax revenue to industrial development corporations for specified purposes, including debt service on bonds.

**ESTIMATED FISCAL IMPACT:**

**Other Fiscal Impact – Future incremental property tax revenue will be redirected from the general funds of participating local governments to industrial development corporations. This bill is permissive and the number of economic impact plans that will be adopted is unknown. If two projects utilize this mechanism, there will be a permissive shift in local revenue in an amount exceeding \$40,000 each year for a period of thirty years.**

Assumptions:

- The provisions of this bill apply to Davidson, Hamilton, Knox, and Shelby counties.
- According to the Department of Environment and Conservation, there are 46 brownfield sites in Davidson, Hamilton, Knox, and Shelby Counties.
- Property tax revenues will be frozen in the year prior to the economic impact plan. Any incremental property tax revenue above this base tax amount generated from a particular area will be allocated to the industrial development corporation.
- Local governments will continue to collect property taxes at the frozen level until the plan's term expires.
- The fiscal impact to local governments resulting from an extension of the time period taxes may be allocated to corporations under an economic impact plan is unclear.
- The average property tax rate is \$4 per every \$100 of assessed value. For every \$1,000,000 assessed value, the taxes generated will be \$40,000. The average property value after development will be \$1,500,000 and will generate \$60,000 in property tax revenue resulting in \$20,000 of forgone revenue to local governments each year.
- It is not known how many economic impact plans will modify their plans under the proposed provision. It is assumed there will be two projects with a frozen assessed value of \$1,000,000 per property each year. The assessed property value after development will be \$1,500,000 per property resulting in forgone revenue to local governments of \$40,000 (\$20,000 x 2) for 20 additional years.
- In project year 31, and each year after, there will be an increase to local government revenues of \$40,000.
